Pre-retirement planning program offered

For the best years of your life

Retirement day finally arrives, complete with a gold watch, pension, good wishes, and remarks such as, "You lucky dog, if only it were me!" The scenario sounds fine, but people are now realizing that it takes more than good wishes or money to make the most of those leisure years. Forethought and planning are needed if the retiree's psychological, physical, financial, and social changes are going to be tranquil instead of traumatic. Since people who are now 50 years of age have an average life expectancy of 30 more years, the investment of time and effort is well worthwhile.

Throughout the country, institutions are developing pre-retirement programs for their employees. But this is happening very slowly, mainly because of the cost involved. Larger institutions, including Gulf Canada Limited and some Ontario universities, introduced programs several years ago. The administration at the University of Guelph decided to develop its own program in response to requests from both management and employees.

The University of Guelph has over 2,500 full-time employees. In the next 10 years, 450 of these employees are due for retirement. The Personnel Department and the Continuing Education Division have jointly developed a new program, "Pre-Retirement Planning," to help these people. Already filled, the first session, for staff, begins this month. It runs for six consecutive Monday mornings. Administration has encouraged Department heads to give employees time off to attend and plan for their retirement years.

David Watt, one of Canada's best known consultants on the subject, has been selected to co-ordinate the program. His team includes specialists in financial planning, health, and a representative from the Federal government who will talk about the Old Age Security Canada Pension Plan. A panel of three people who have retired from the University in the last few years will discuss how they dealt with basic problems. Throughout the program, employees will be encouraged to ask questions, and the emphasis will be on practical information.

"We want to give our employees the tools necessary for dealing with the changes that accompany retirement," explains Director of Personnel, Roy Pella. "The program will help them to assess their needs and skills and set out clear goals for the future." He stresses that people should begin preparing for retirement between the ages of 55 and 60. Often the tendency is to ignore the fact that retirement is on the horizon, he says, until it is too late to make adequate provisions.

Mrs. Josephine Clark, a custodian in Housekeeping and Bob McEwen, a policy and procedures officer and contract administrator in the Comptroller's Office, are two University employees who fully intend to enjoy retirement. Both will be leaving in three years. For them, taking the course is just another step to ensure the future.

Retirement is Third Career

Everyone should plan on having at least three careers believes Mr. McEwen. Educated as an accountant, Mr. McEwen was the secretary-treasurer of ITT Canada before coming to the University. Retirement, his third career, promises to be varied and fascinating, but this will not happen by chance. For years now, he has developed outside interests which will continue into retirement, explains Mr. McEwen.

Consulting with industry will keep him in touch with the world of business. Working with wood to make furniture and educational toys will continue to give pleasure to him and other people.

An active member of the Kiwanis club for many years, Mr. McEwen intends to continue doing volunteer work through the Wellington Men's Club, which was recently formed for retirees. At the program, he hopes to learn about other special organizations and services for seniors.

With his extensive background in the world of finance, Mr. McEwen is particularly interested in the pre-retirement planning program as a means of learning how retirees can enhance their incomes. He emphatically agrees with Mr. Pella that long-range financial planning is crucial.

A Senior to Help Seniors

Mrs. Clark, one of the founders of the first senior citizens club in Guelph, will continue to help seniors when she becomes one herself. "I have always been very interested in people and in helping when it is necessary," she says.

For information on pre-retirement planning, contact Karen Kowats, Personnel, Ext. 3058.EI

Bob McEwen and Josephine Clark — two employees who are planning for a rewarding retirement.

Scottish Studies conference

The bi-annual conference on Scottish Studies will take place in Room 117A, MacKinnon building Saturday, October 30.

Registration begins at 9:30 a.m. with the first paper scheduled for presentation at 10 a.m.

Professor David Buchan, Head of the Folklore Institute, Memorial University, Newfoundland will speak on "Scottish Traditional Rhymes" (see Visiting Professors.)

Stuart MacDonald, a graduate of the Guelph M.A. program in Scottish Studies and now of Knox College, will discuss "The 'Last of Remedial Measures': Highland Emigration to Canada in the Late Nineteenth Century." Professor Alec Ross, formerly of the Department of English Language and Literature, will present "Scott's *Waverley* and the Picturesque." The program will be rounded off by Captain Allan Snowie, who is studying at Guelph, on "The Highland Fusiliers of Canada. The Waterloo County Regiment." The regiment's uni-

form will be on display, and a piper will be on hand.

All are welcome. For further information contact the Department of History, Ext. 3887 or Professor Ted Cowan, Ext. 3226. □

A critical approach to science, philosophy

The inaugural meetings of what is hoped will become a monthly regional colloquium for the critical approach to science and philosophy will be held on campus this fall.

According to Political Studies professor, Fred Eidlin, the colloquium aims to bring together people from various disciplines and professions who have encountered philosophical problems which appear central to their work or their disciplines. Papers will present problems arising from various disciplines and will not include technical knowledge. Participants will take as a point of departure certain features of the philosophy of Karl Popper.

At the first meeting, Sunday, October 24, School of Engineering professor, Peter Chisholm, will present a paper "Problem-Solving/Science of Living," and York University philosophy professor, Joseph Agassi, will speak on "The Importance of the Problem of Rationality." This meeting is at 1:30 p.m. in Room 441 of the University Centre.

On Sunday, November 14, same time, same place, Sociology and Anthropology professor, Stanley Barrett, speaks on "Some Like it Hot: Methods of Research Among Radical Racists." York University philosophy professor, Ian Jarvie, will present a paper, "Relativism and Socio-Cultural Transcendence." □

Goods and Services

For Sale — Smith-Corona Classic 12 manual typewriter w/carrying case, 822-4568, after 1800; Iron clawfoot bathtub & faucet, 822-0807 between 1600 and 1900; 1975 Ford half-ton pick-up, 21" B & W TV, Beagle puppy, registered black miniature poodle puppies, 843-4369; small refrigerator, 2486.

Available — German tuition and translations, all levels, 836-8597; Seamstress, alterations and drapes, 658-9952.

Accommodation

For Rent — Florida Condominium apartment (3 rooms) on Gulf of Mexico at Ft. Myers Beach, available Feb 5-12 or Feb 12-19, 824-1601; University-owned house, 3 bedrooms, study, available Dec-April, 821-6774.

For Sale — Two-storey brick house, 3 bedrooms, garage, downtown, 856-4790 between 1800 and 1900.

Sigma Xi lecture

Professor Rupert E. Billingham, department of cell biology, University of Texas Health Science Center at Dallas and one of Sigma Xi's national lecturers, will speak at Guelph Thursday, October 28. His visit is sponsored by the Guelph chapter of Sigma Xi, the Department of Biomedical Sciences, and the Department of Veterinary Microbiology and Immunology.

Dr. Billingham will deliver a public lecture at 3 p.m. in Room 100 of the Botany, Genetics and Zoology building entitled "Immunology of Reproduction."

Educated at Oxford where he received a Ph.D. in 1950, Dr. Billingham was a faculty member at the University of Birmingham, England, and a Research Fellow of the British Empire Cancer Campaign. In 1957, he joined the Wistar Institute of Anatomy and Biology in Philadelphia, and, subsequently, was professor and chairman of the department of medical genetics and director of the Henry Phipps Institute, University of Pennsylvania School of Medicine. He has been at the Texas Health Science Center since 1971. Dr. Billingham is a Fellow of the Royal Society of London, the New York Academy of Sciences, and the American Academy of Arts and Sciences.

Details: Professor George Renninger, Physics, president, Guelph chapter, Sigma Xi, Ext. 3777 or Ext. 8398. □

McLean Memorial Lecture

Dr. Peter J. Barry, professor of agricultural finance at the University of Illinois is on campus to give the McLean Memorial Lecture. This is a lecture in the series sponsored by Canada Packers each year. It is organized by the School of Agricultural Economics and Extension Education.

The main lecture, which will be presented at 8 p.m., October 14 in Room 102 of the Agricultural Economics and Extension Education building is entitled "Financial Management Issues in Agriculture."

Dr. Barry will also give a public lecture on the afternoon of October 13, at 4 p.m. in Room 103 of the University Centre on "Balance Sheet Management: A Farm Finance Orientation for the 1980's." □

Michael Moss

Professor Michael R. Moss is the new chairman of the Department of Geography. A B.Sc. graduate in geography from the University of Leeds, Prof. Moss received his Ph.D. in 1973 from the University of Sheffield. He came to Guelph in

1976 following earlier appointments at Strathclyde University, Glasgow and Brock University. He has also spent time in Malaysia and New Zealand.

During his teaching career Prof. Moss has taught a wide range of courses both at the undergraduate and graduate level. He has served as graduate officer of the Department and has played a role in liaison with high schools. Most recently, he has been involved in teaching a course for the new University School of Rural Planning and Development.

Prof. Moss is a physical geographer with special research interests in applied ecosystem analysis and biophysical process studies. His published research includes work on vegetation/land process interaction on the Niagara Escarpment and on vegetation dynamics in southern Ontario rural areas. A current project concerns biophysical land classification schemes in Canada and in the humid tropics. His latest book (with S.R. Aiken, C. Leigh and T. Leinbach), *Development and Environment in Peninsular Malaysia* (Singapore: McGraw-Hill International, 1982) also reflects his interest in the field of environmental data input and the impact of rural land development in the humid tropics. □

iN ET trail begins

The launching of the iNet Gateway field trial by the Trans Canada Telephone System this summer opens up the prospect of an almost unlimited number of avenues of access to widely diverse information sources and systems.

Eight interest groups are participating in the trial, including banks, broadcasting corporations, government, legal institutions, the petroleum industry, real estate firms, travel agencies and a bibliographic group. The latter will link the National Library of Canada, the Canada Institute for Scientific and Technical Information at the National Research Council Library, Carleton University, the Université du Québec and the Universities of Guelph and Waterloo.

The prime objective of the group is to gain experience and collect important data for the development of a nation-wide decentralized bibliographic network, according to Associate Librarian, Professor John Black.

A number of automated bibliographic data systems have been installed in recent years. The variety of computer hardware and software, however, has resulted in some degree of incompatibility between systems. Information held by one system may not be readily available to another. By using iNet Gateway as a vehicle, incompatible systems can be linked and bibliographic and other information interchanged between them.

The trial groups are not mutually exclusive. All participants will have access to the various data bases as a result of the iNet Gateway. The quantity of electronically-stored information available to the bibliographic group alone is formidable, but the full potential of the combined access to all groups beggars the imagination.

Assistant Librarian, Services, Ellen Pearson, demonstrating the system recently, showed that the selection of specific items of information from such a plethora of data consists of little more than calling up a series of "menus within menus" at electronic speed. The process is simple; it requires only a minimum of training.

Prof. Black says that iNet makes it possible to access more information, more accurately and more quickly. Twelve University people have user identification access to the trial network. One user identification was given to the Guelph Public Library. The off-campus participation provides an opportunity to develop co-operation with public library systems in general, and to meet community information needs, notes Prof. Black.

The immediate result of the projected one-year trial should be to open up a national communications network with more or less universal accessibility, predicts Prof. Black □

Long-service awards given at Retirees' Party

Some 3,978 years of service to the University were recognized at the eighth annual Retirees' Gathering held at the Arboretum September 29. Retirees' service awards were presented to 122 former employees, including, lower, left, Roy Harrison who worked for the University for 52 years, and lower, right, May Urquhart, a 40-year employee. President Donald Forster presents the certificates. Splendid autumn weather permitted many of the approximately 330 retirees who attended, above, to enjoy tea on the patio of the OAC Centennial Centre.

Celebrate autumn at the Arboretum

The University of Guelph Arboretum and Concert Management of the Department of Music invite you to participate in the opening of the fifth season of "Arboretum Days."

Autumn Day at the Arboretum will bring together all the color, sounds and enjoyment of the fall. The Nature Centre will be open from 11 a.m. to 3:30 p.m., and the OAC Centennial Centre from 1 p.m. to 3:30 p.m. Arboretum trails will be open for those who wish to walk through the Victoria Woods, and collections of various plants will be on display. At 2:30 p.m., there will be a free concert in the OAC Centennial Centre featuring Toronto accordionist Joseph Petric, assisted by violist

Douglas Perry, cellist John Helmers, and vibraphonist John Brownell.

The program includes "Sonata in D Major" by Albeniz; "Sonata in F Major" by Galles; several sonatas by Casanovas and Scarlatti; "Française" by Poulenc, arranged by Hugo Noth; "Cinq Doigts" by Stravinsky, arranged by Mr. Petric; Sechs Variationen (1960) by Padros; and two recent Canadian compositions, "Sonic Eclipse for Accordion and Cello" by R. Romiti, a work commissioned privately by Joseph Petric, and "Homage Klee for Accordion, Viola and Vibraphone" by Daniel Foley, a member of the teaching faculty in the Department of Music. The Foley work was commissioned by the Canadian Federation of University Women. □

A dozen ways to improve economy

Canada's massive unemployment, high interest rates, inflation, and large government deficit can be alleviated if government will only act, according to The Honourable Walter Gordon.

Best known for his policies to promote economic nationalism while Minister of Finance in the first Pearson government, Mr. Gordon discussed "The Economic Emergency: A Blueprint for Recovery" at War Memorial Hall last Tuesday as part of the Community Campus Forum Series.

Complete recovery in all areas will be impossible until the world economy improves, he believes. However there is a great deal Canadians can do themselves, he said, as he presented over two dozen measures to improve the current situation. Among these: Interest rates should be reduced to approximately 11 per cent. The exchange rate should then be allowed to float at about 70 cents to the American dollar. To stimulate the economy and reduce employment, N HA mortgages should be available at about eight per cent for certain citizens; the Guaranteed Income Supplement should be increased; the government should aid industry in developing goods now being imported; a municipal development fund should be established, and megaprojects in the energy field should be explored.

Addressing the deficit on Canada's balance of payments, he suggested that the withholding tax on interest, dividends, management fees, and royalties paid to foreigners should be increased. At the same time, a substantial tax should be imposed on such monies earned abroad, to discourage Canadians from investing in other countries.

Regarding the government's estimated \$20 million deficit, Mr. Gordon emphasizes that social security items, such as unemployment insurance, family allowances, and old age security should stay in place, while loop-

holes should be eliminated. "The most effective reduction means would be to stimulate the economy and reduce unemployment," he said. "The resulting increase in tax revenues should result in a major reduction in the deficit."

Mr. Gordon ended on the optimistic note which underpins his nationalistic theories: "We have most of the natural resources we require, and in particular, an energetic, hard-working and well-educated citizenry."

Allan Blakeney, leader of the opposition, Saskatchewan Legislative Assembly, will also speak on the Canadian economy at the next Community Campus Forum lecture Tuesday, October 19, 8 p.m., War Memorial Hall. Information and tickets: Ext. 3958.]

Faculty Club officers

The 15th annual general meeting of the Faculty Club was held recently. The executive for the new year consists of: president, Professor Phil Sweeny, Microbiology; vice-president, Professor Bruce Forster, Economics; treasurer, Al McGinnis, Residences, and secretary, John Wills, Property Management.

The house committee is headed by Professor Ted Cowan, History; art committee, Sandra Webster, Information Services, and membership committee, Bob Logan, Library.

The Board of Directors also consists of Dudley Gibbs, Department of Music; Ernie McFarland, Physics, Kent Percival, Institute of Computer Science; Professor Helier Robinson and Professor Michael Ruse, both Philosophy.

Members extended thanks to outgoing president George Edwards, Accounting, for a very successful year. Thanks was also extended to retiring members of the Board. □

Energy Conservation Contest

The Energy Conservation Committee is sponsoring its fourth energy conservation contest. Members of the University community are asked to make suggestions.

The best idea that can be implemented will be acknowledged by the award of a certificate and a solar-powered scientific calculator.

The entries will be judged according to cost of implementation, annual energy saving, originality, and practicality.

Keep in mind that the more specific your suggestions, the easier they will be to evaluate. Calculations need not be included, but information which helps to substantiate potential savings would be helpful. Duplications will be decided in favor of the first idea received.

The judging committee will consist of a student, a faculty member, the energy conser-

vation technician and the chairman of the Energy Conservation Committee.

Mail your ideas to the Energy Conservation Committee, Trent building, by November 5. Include your name, address and telephone number. The winner will be announced by November 19 in the *News Bulletin* and the *Ontarion*.

The first contest was won by Nora Valcourt, a student who suggested individual switches on Library study carrels. The second was won by William Green, a 1971 O.A.C. graduate for a suggestion that stickers showing energy consumption be placed on equipment such as fumehoods. The third contest was won jointly by Bruce Gitelman, a student, for a suggestion to improve control of the heaters in South Residence and Lloyd Thackery, who suggested individual switches be placed on several fumehoods. □

FOCUS

Director of Medical Services

The suggestion that Dr. A.J. MacLaughlan should apply for the position of Director of Medical Services for the University came via a late-night telephone call from a colleague.

It took him by surprise. "My first reaction was that students' problems were less than challenging. But once I began to look into it, the real dimensions of the work became apparent."

Born in Vancouver in 1942, the University's doctor graduated from the University of Toronto Medical School and practised in northern Ontario before settling down in Fergus. There he ran a family practice for five years, served as chief of staff for the Fergus Hospital and sat on the Guelph Hospital Centre redevelopment committee. He is also a chairman of district three of the Ontario Medical Association.

Aside from his professional emphasis on family medicine, Dr. MacLaughlan has long involved himself in sports medicine. He is medical director for the board of the Guelph chapter of the Canadian National Therapeutic Riding Association. Therapeutic riding? "Children with such handicaps as cerebral palsy or blindness are able to achieve high levels of competence on horseback. It frees them from the restrictions normally imposed by their individual disabilities."

The movement is 10 years old in North America and, growing in popularity. We are already designing buildings and looking for land in the Guelph area"

Dr. MacLaughlan's interest in riding for the handicapped is symptomatic of a whole professional philosophy. He treats illness, but his real interest is in health. He says it is not sufficient to eliminate the negative aspects of ill health. "We have to focus on the positive achievements which good health makes possible. Young people are not contented merely to be well; they want the successes which come with a total sense of well-being." He finds this attitude one of the attractive aspects of his new job: "It is exciting to work with such a large group of people who share mutual concerns and goals which are similar to the extent that all are strongly motivated towards success."

He is also excited about being so close to so many resource centres related to health care and improvement — nutrition, human kinetics, athletics, toxicology, psychology, plant and animal disease, zoology and animal pathology. The possibility of working within informal interdisciplinary structures focussing on all facets of human well-being are very rich," he anticipates.

Professor David Buchan

The world's foremost authority on Scottish folklore and folk literature will be visiting professor of Scottish Studies in the Department of History from Monday, October 25 - November 5. Professor David Buchan, formerly of the University of Stirling, is head of the Folklore Institute at Memorial University, Newfoundland.

During his visit Prof. Buchan will address the Scottish Colloquium, Saturday, October 30, (see story) on "Scottish Traditional Rhymes"; The Scottish Studies graduate seminar on "Folk Literature and History," Thursday, October 28 and on "The Classical Ballad," Tuesday, November 2. Faculty members and graduate students of the Department of English Language and Literature will deliver a public lecture on "'This Happened to a Friend of a Friend ... ' Contemporary Legends in Britain," the time and place to be announced.

People interested in meeting Dr. Buchan or wishing to attend his presentations, should contact Professor Ted Cowan, Ext. 3226.EI

Dr. Alun Hoddinott

The renowned Welsh composer, Dr. Alun Hoddinott, is a visiting professor in the Department of Music to November 2, 1982. He is presenting a series of classes and informal seminars for students, faculty and staff and public during his visit. On Sunday, October 31, at 2:30 p.m. in Music Room 107, MacKinnon building the first concert of the 1982/1983 "Faculty and Friends Concert Series" will present his music in recital.

Born in Bargoed, Glamorganshire, South Wales, Britain in 1929, Hoddinott won a university scholarship at 16 years of age. After graduating from the University College of South Wales, Cardiff, he studied for some years with the Australian composer and pianist Arthur Benjamin. He was awarded the Walford Davies prize for composition when he was 24 years of age and achieved his first success a year later when his "Clarinet Concerto" was given its first performance at the Cheltenham Festival by Gervase de Peyer and the Halle-Orchestra under Sir John Barbirolli. In 1951 he was appointed lecturer in music at the Cardiff College of Music and Drama; he later became lecturer at the University College, Cardiff, and professor of Music there in 1967.

In addition to composing, teaching and administrating, Hoddinott organizes the annual Cardiff Music Festival.

Anyone wishing to meet Dr. Hoddinott should contact Dr. Stanley Saunders, Director of Music, Ext. 3127.EI

School of Hotel and Food Administration professor, George Bedell, left, and Phillip Chan go over the menu which was selected the winner of the 1982 Hotel and Restaurant Show award. Mr. Chan credits his win to lessons learned in the Hafa course, "Menu Design."

The menu says it all

To those of us who enjoy dining out, a menu is a printed folder which lists dishes and prices. To School of Hotel and Food Administration graduates, it is the graphic representation of a comprehensive process from which no aspect of restaurant planning is omitted.

Phillip Chan, a 1976 Hafa graduate who is general manager of the China Tiki Restaurant on the Silvercreek Parkway in Guelph, has been selected the winner of the 1982 Hotel and Restaurant Show award for the best designed menu in its category. He gives the credit to lessons learned in the Hafa course, "Menu Design."

Mr. Chan revised his menu after conducting a market analysis. He discovered that 70 per cent of his restaurant's customers were women. Moreover, an even larger percentage of the decisions on where to dine were made by women. He changed the menu artwork to please this audience, replacing the traditional reds, blacks and golds associated with Chinese restaurants, with pinks and greys to enhance an orchid motif.

He also examined the relationship between individual menu items, kitchen facilities and staff. He took into account the need to have a wide range of dishes which could be prepared by using a small number of cooking processes such as the wok and the deep-fryer. New procedures have made it possible for a fairly small staff to respond quickly to any customer order.

Mr. Chan is proud of his menu. He draws attention to the "nibblings," tooth-

some, inexpensive concoctions to be enjoyed by the after-theatre crowd or by couples who want to relax with a few drinks. The a la carte section, with its Anglicized versions of Chinese names, looks particularly enticing. Dinners for two, four or six people have been replaced by dinners for two or more so that parties of any size may enjoy an economical meal which offers an interesting variety of dishes. The growing popularity of Szechuan dishes is acknowledged in a new section of hot foods, while a mouth-watering selection of desserts such as "Tiki Praline," "Mandarin Cheese Cake" and "Sweet Almond Custard" replace the prosaic fortune cookie.

Mr. Chan says his courses at Hafa helped him to see all aspects of the operation of a successful restaurant as inter-related: "Nothing can be considered in isolation. Production, marketing, service, product, decor, atmosphere and pricing policy must blend into an intergrated whole." □

GRADUATES of Edinburgh University are invited to the forthcoming Quartercentenary of that University in 1983. A program commemorating this event is planned for July 2 to July 10, 1983. Those interested in receiving a program of events should write to the following address: Mr. R. Footman, Information Officer, Old College, Edinburgh, EH8 9YL. Those unable to attend may obtain information about their alma mater through the *Journal of the Graduates Association* by writing to the secretary, Edinburgh University Graduates Association, 5 Buccleuch Place, Edinburgh, Scotland, EH8 9LN.

THE CANADIAN RED CROSS Society says thanks to the 190 donors who attended the clinic on campus recently.

The next clinic is in Peter Clark Hall of the University Centre November 16. Details will be announced shortly.

THE WELSH MALE VOICE CHOIR Cor-y-seren will sing at Chalmers United Church Saturday, October 16 at 8 p.m. Tickets, at \$5 general, \$4 students and seniors, are available at the door. The program will include a range of secular and religious music. The group is sponsored by Guelph's Chamber Music Society.

YOUNGSTERS will enjoy a special Hallowe'en treat this year when the University Centre presents entertainer Fred Penner Sunday, October 31. The concert is part of the "Singalong Series" for young children sponsored by Programming, University Centre, but is a performance the whole family can enjoy.

The concert begins at 2 p.m. in War Memorial Hall. Tickets at \$3.50, are available from the University Centre box office in the courtyard of the University Centre.

THE FAITH AND AGRICULTURE series of lectures and discussions now under way represent an attempt to come to grips with critical ethical questions related to the use and exploitation of the environment. As campus chaplain, Ed Den Haan, sees it, the problems of developing a proper relationship with the natural world are not exclusively economic or scientific; there are links between all living things which must be understood if that relationship is to be a healthy one. Important religious questions are involved.

Some 40 people have been attending the meetings and discussions held every Tuesday evening in Room 141 of the Animal Science building.

THE GUELPH YM-YWCA seeks books for its November book sale. Please contact the Guelph "Y" at 824-5150 if you can assist them in this endeavor.

WOMEN interested in organizing events to celebrate International Women's Day March 8, 1983 will meet Wednesday, October 13 at 7:30 p.m. at the Guelph International Resource Centre, St. George's School, 21 King Street, Guelph. New participants are welcome. Information: 836-4814.

A MICROCOMPUTER Consumers' Report seminar, a two-day event designed to give you insight into the exciting world of small systems will be sponsored by the Institute of Computer Science Tuesday, October 19 and Wednesday, October 20.

On October 19 microcomputer hardware will be featured. At 9 a.m., and again at 1:30 p.m., there will be a brief introduction to technical terms and a description of how to evaluate small systems. After the introductory remarks there will be a talk with vendors and an opportunity to try out these small systems: IBM Personal Computer, Superbrain, TRS80, Apple, Displaywriter, Hewlett-Packard, Commodore Pet and DEC Rainbow.

On October 20 the small systems will be available to display a variety of software packages. From 9 a.m. to 9:45 a.m. Al McGinnis, Director, Department of Residences, will demonstrate several of the popular business software packages, such as "Visicalc," a word processing package, and "PFS"

(Personal Filing System.) From 9:45 a.m. to 10:15 a.m. Peter Taylor, co-ordinator, publications, Office for Educational Practice, will demonstrate "Visifile," and from 1:30 p.m. to 2:30 p.m. Chris Findley, a graduate student in the Department of Food Science, will demonstrate and discuss scientific uses of small systems.

The program is offered in Room 141 of the Animal Science building. To register telephone Lisa Menegon, Ext. 3046.

THE UNIVERSITY WOMEN'S Club of Guelph is holding a "Meet the Candidates Night — with a Difference" at the Guelph Public Library Tuesday, October 27 at 8:15 p.m. The meeting is open to the public.

Details: Fenella Townsend, Ext. 3778.

BETTY-JEAN HAGEN, violin, and Arthur Rowe, piano, will present the Thursday Noon Hour concert October 14 in Music Room 107 of the MacKinnon building. Program I, at 12:10 p.m. will consist of Beethoven's "Kreutzer Sonata in A Major, Op. 47." The second program at 1:10 p.m. will include "Adagio" by Kodaly; "Rhapsody No. 1" by Bartok; Tchaikowsky's "Serenade Melancolique, Op. 26," "La Fontaine d'Arethuse" by Szymanowski and Wieniawski's "Scherzo-Tarantella."

Sponsored by Concert Management, the concerts are open to the public and admission is free.

SEXUAL VALUES SEMINARS, designed to provide information and discussion on current issues in sexuality are to be offered this month by the Counselling and Student Resource Centre. At 12 noon, Wednesday, October 20, Professor Michael Ruse, Philosophy will discuss the realities and myths associated with homosexuality. On Wednesday, October 27, Susan Brown, RN, Medical Services, will give two talks on sexually-transmitted diseases at 12 noon and 5 p.m. respectively. The seminars will be held in Room 441, University Centre.

Faculty Association establishes awards

Two new awards have recently been established by the Faculty Association. An annual \$1,500 scholarship will be awarded to an outstanding Wellington County High School student entering an undergraduate program at the University of Guelph. Admission averages will be used to determine the recipient from among the eligible candidates. The award will be paid in three installments of \$500 per annum in the student's first, third and fifth semester levels provided a cumulative "B" average is maintained.

The Faculty Association has also initiated professorial teaching awards to recognize a "Distinguished Professor" from each College, a "Distinguished University Professor" from among the College awardees, and two "Special Professorial Merit Awards" which are based on innovation and continued excellence. □

The posthumous poems of University of Guelph English graduate Shirley Therese Lewis have been edited and published.

Mrs. Lewis, nee Walton, lived in Guelph for 15 years. A white immigrant from the Barbados, the mother of five children received her B.A. from Guelph in 1973. At the age of 39, she completed her Master's degree at Guelph; her thesis a study of the poet-mystic William Blake. In 1977 she began to write poetry, much of it unconventionally religious. Two years later she learned she had cancer; she died in 1981.

According to editor Paul Hourihand of Georgetown, instructor for this fall's Continuing Education program "The New Mysticism" and a former teacher of literature in the Department of English Language and Literature, Mrs. Lewis's poems foreshadow the advent of death before the disease is discovered, and a number of her strongest pieces reveal her triumphant struggle with it. In her very last poems, the conquest of the disease and its saving role in her spiritual struggle are clearly reflected.

Copies of *My Quarrel With Myself* are available from Phoenix Press, Box 12, Georgetown, Ontario, L7G 4T1.

Dr. Gareth Davies

Dr. Gareth Davies of the Epidemiology Unit, Central Veterinary Laboratory (MAFF), Weybridge, Surrey, England, visited the OVC in September. During his stay he delivered a seminar, "Disease Surveillance in the United Kingdom," and met with OVC Dean, Douglas Maplesden, Veterinary Microbiology and Immunology chairman, Dr. J.B. Derbyshire, Clinical Studies chairman, Dr. M.R. Wilson, Agriculture Canada veterinarians and Veterinary Microbiology and Immunology faculty members and staff connected with OVC's computer group.

Volleyball

The opening match of the 1982-1983 Gryphon volleyball season is Friday, October 22 at 8 p.m. between Guelph and the University of Waterloo Warriors and Athenas.

The Gryphon men's team, led by 1981's league MVP Vilis Ozols, expects a strong season with Waterloo one of the teams to beat. Waterloo will feature outstanding freshmen Owen Jones from Guelph Collegiate and David Ambrose from OFSSA Champion Waterloo Oxford. Although a pre-season contest, the match will be a preview of some of the exciting action expected in the OUAA season.

The Gryphon women's team features several outstanding freshmen. They expect a tough match from perennial contender Waterloo. □

Elected President

Professor J.G. Murray, Continuing Education and Political Studies, has been elected president of the Canadian Association of University Continuing Education (CAUCE), the national professional association of deans/directors of extension and continuing education.

At the annual conference, Prof. Murray moderated a panel session and delivered a paper on "The Training of University Adult Educators."

Prof. Murray was also appointed to his sixth consecutive term as managing editor of the Canadian Journal of University Continuing Education, the refereed professional journal of CAUCE.

CAES President

Professor G.L. Brinkman, School of Agricultural Economics and Extension Education, was installed as president of the Canadian Agricultural Economics Society at its annual meetings held in Vancouver. He gave the presidential address "The Role of Agricultural Economists in an Urbanized Agriculture."

He also attended the annual meetings and participated in the executive meetings of the American Agricultural Economics Association, at Logan, Utah and made presentations to the Hamilton-Wentworth Federation of Agriculture on "Longterm Development Options for Canadian Agriculture" in Ancaster, and to the Halton Federation of Agriculture on "Farm Incomes and Assets," held in Milton.

Elected Fellow

Professor Cameron R.J. **Man**, Director of the School of Landscape Architecture, was elected a Fellow of the Canadian Society of Landscape Architects at the annual conference held in Toronto.

Prof. Man was honored "for your initiative in establishing the profession in the Prairies; for your inspiration to countless other landscape architects and students; for your work with international organizations, such as the Council of Educators in Landscape Architecture; for your promotion of the profession through excellence in practice and teaching, and for your dedication to the professional societies, especially the American Society of Landscape Architects and Council of Educators in Landscape Architecture."

Professor Roy **Anderson**, Chairman, Department of Zoology, has been elected to the American Society of Parasitologists as a council member-at-large for 1983-1986.

Alumnus of the Year

Professor D.A. Barnum, Department of Veterinary Microbiology and Immunology, was presented with the Distinguished Alumnus of the Year Award by Dr. A. MacKinnon, president of the OVC Alumni Association, at the annual meeting and banquet of the Association.

Travels and Seminars

Professor D.A. **Barnum** and Mr. Lloyd Thackeray, Department of Veterinary Microbiology and Immunology, completed their assignment for the veterinary diagnostic microbiology

training course held in Tanzania. This course, sponsored jointly by the University of Guelph, CIDA, UNESCO and FAO, was attended by veterinarians from seven African countries. Prof. Barnum was scientific co-ordinator and principal lecturer of the course, while Mr. Thackeray was responsible for all laboratory aspects. They were involved with workshops in Malaysia and Sri Lanka in previous years.

Professor Elmer Alyea, Chemistry, presented a paper co-authored by A. **Somogyvari** on "Molybdenum-95 Nuclear Magnetic Resonance Studies of Substituted Molybdenum Carbo-nyls" at the Fourth International Conference on the Chemistry and Uses of Molybdenum held at Golden, Colorado. Two graduate students, A. **Vougioukas** and A. **Somogyvari**, presented papers co-authored by Dr. Alyea at the **XXII** International Conference on Co-ordination Chemistry held in Budapest, Hungary. Their papers were: "Transition Metal Complexes of Olefinic and Bidentate Silicon-Backbone Phosphines" and "Spectral-Structural Correlations for Some Seven-Co-ordinate Molybdenum(II) Compounds," respectively.

Professor J.C. Alexander, Nutrition, attended the annual meeting of the American Chemical Society at Kansas City, Missouri. He presented an invited paper "Biological Properties of Heated Dietary Fats" as part of a symposium on xenobiotics in foods and feeds.

Professor Alan Brookes, History, presented a paper "Migration and the New England-Maritimes Community, 1760-1930" to the New England Historical and Genealogical Society at Acadia University, Wolfville, Nova Scotia.

Professor Harry Cummings, University School of Rural Planning and Development, attended the Canadian Council on Southeast Asian Studies/Institute for Southeast Asian Studies Joint International Conference on Village Level Modernization: Livelihood, Resources and Cultural Continuity held in Singapore.

He delivered a paper, "Integrated Rural and Regional Development Strategies for Sulawesi, Indonesia" with Chris Dagg of the Canadian International Development Agency.

Janet Kaufman, Library, has accepted the invitation of the Canadian Library Association Committee on Committees to become the convener of the government publications committee. Her term of office is to June 30, 1984.

The major responsibilities of this committee include acting as liaison among the various interested organizations, and between libraries and the several levels of government, as well as the publication of relevant articles.

Robert Munsch, Family Studies, gave library readings in Stratford, Goderich, Waterloo and Cambridge(H) recently. The requests for readings came because his book, The Paperbag Princess, was chosen as a favorite by children in the Midwestern Regional Library System.

Professor John Patterson, School of Hotel and Food Administration, attended the annual meeting of the Council on Hotel, Restaurant and Institutional Education at Scottsdale, Arizona, as an international representative.

Professor David Piggins, Psychology, gave a talk to the Guelph Men's Club on "Visual Illusions."

Professor John Powell, Human Biology, has been informed that his film Cardio-Vascular Club has been entered in the Ninth International Festival of Sports films October 13, to October 18 in Kranj, Yugoslavia.

Professor J.C.M. **Shute**, School of Agricultural Economics and Extension Education, was co-ordinator, and **Professor P. Farragher**, instructor, for the workshop on "Teaching Methods in Agriculture" held at the University of Guelph. Twenty-five college and university lecturers selected from 275 applicants and representing 24 developing countries, participated in the workshop which was sponsored by CIDA, UNESCO, and the University School of Part-time Studies and Continuing Education.

Prof. Shute was also elected to the governing council of the Society for International Development which is composed of four members from each of six regions of the world. He attended the first meeting of the new council held in Baltimore, Maryland.

He also presented a number of papers with Professor M.W. Waldron, Director, University School of Part-Time Studies and Continuing Education, on "Innovative Teaching Practices," to the Sweden-Canada Seminar on Research and Creative Teaching, University of Guelph; on "Canada and Third World Rural Development: Some Educational Issues," to the annual conference of the Comparative and International Education Society of Canada, University of Ottawa; and with **Professors R.B. Hunter**, Crop Science and N. Williams, University of Ghana, on "Long-Term Technical Assistance," to the World Conference of the Society for International Development, Baltimore.

Professor Gilbert Stelter, History, presented a paper "The Hopes and Realities of Canadian Urban Planning" to members of the Canadian Studies Centre, University of Edinburgh, and a paper, "Urban History and the Development of Social History" to a Symposium on Social History at Carleton University sponsored by the journal, Histoire sociale.

Professor Janet Wood, Chemistry, travelled to Kyoto, Japan in June to attend the Fourth International Symposium on the Genetics of Industrial Micro-organisms. Dr. Wood attended GIM-82 as Canadian recipient of a travel grant from symposium organizers. She presented the results of research on "The Influence of Active Transport on L-proline Excretion by *Escherichia coli* K12" that she has completed in collaboration with **Jim Stephenson**, currently a Guelph DVM candidate and **Sandra Korycan**, a GWC undergraduate summer research assistant from Carleton University.

After the symposium Dr. Wood visited the laboratories of Dr. Masamitsu Futai, University of Okayama and Dr. Yasuhiro Anraku, University of Tokyo, to discuss with them her ongoing fundamental research on the biochemical characteristics of the enzymes of proline transport and oxidation in *E. coli* K12.

Next Week at Guelph *Continued from page 8.*

THURSDAY, 82 10 21

Graduate Student Research Seminar - BOVINE LEUKEMIA VIRUS INFECTION IN SHEEP, T. Stirtzinger, 1110, Pathology 220.

Brass Taps Noon Concert - ELIAS SCHRITT AND BELL, 1200, UC courtyard.

Art Exhibit - CIRCA 1800, British and European printmaking, continues to Nov 21, Macdonald Stewart Art Centre.

Thursday Noon Hour Concert - ROBERT EDWARD SMITH, harpsichord, 1210 and 1310, MacK107.
