## OCUFA discusses two-tiered bargaining system

A new scheme for negotiating academic salaries will be the main subject of discussion at OCUFA's Spring Conference May 7 and Spring Council Meeting May 8 and 9, both to be held at the University of Guelph.

Against a background of general disenchantment with the provincial government's system of university funding based on the often erratic nature of yearly enrolment figures, an ad hoc working group of OCUFA members and university presidents has been meeting monthly since last September to look into the matter of academic salaries. OCUFA president Norma Bowen says the year to year provincial financing has undermined the stability of the universities' operation and made long-range planning impossible. In a second revised report published on March 26, the group suggests that to provide reasonable stability for the university system over the next few years there must be an improved basis of support for academic salaries in terms of salary levels and faculty numbers. This can best be achieved, it believes by separating salary funding from other aspects of university support.

The group's proposal to be considered by delegates is a two-tiered province wide system of negotiation. At the first level, representatives from all the Ontario universities — faculty and presidents — would meet to decide on a salary scale including three components: cost of living (across-the-board increments to scale), career progress/merit (discretionary distribution) and fringe benefits related to salary.

## Victorian exhibit open to public

An exhibition of Victorian paintings, furniture, photographs, textiles and other articles has been assembled by University of Guelph art curator Judith Nasby for the upcoming Symposium 1975 — Canada in the Victorian Image 1837-1887.

The exhibition will provide an opportunity to examine many of the styles in art, furniture, clothing and even toys which are the hallmarks of the Victorian years. Mrs. Nasby has obtained the articles for the exhibition from the university's own collection, the Royal Ontario Museum, Dundurn Castle, the Art Gallery of Ontario, Black Creek Pioneer Village and other public and private collections.

The symposium, which will provide in-depth exploration of this important part of Canada's cultural heritage, the architecture and the fine and decorative arts of England and their influence on Canada during the Victorian years, is sponsored by the University of Guelph and the Canadian Antique Collector under the patronage of the Macdonald Stewart Foundation.

Examples of Victorian furniture from Canada, the United States and Britain, much of it ornate, overstuffed and richly upholstered will have a prominent place in the exhibition.

Clothing on display includes examples of the bustle, popular in the 1870s and again in the mid 1880s, and a lady's black riding hat which looks like a top hat trimmed with a black lace veil and velvet ribbons.

Portraits, landscape paintings and pastoral water colours were popular in Victorian

homes. Examples of the art include water colours of Guelph scenes by David Johnson Kennedy. Music was important to the Victorian family. In the exhibition are an ornate Guelph-made melodian, predecessor of the modern piano, a harmonium and a violin zither.

Examples of needlework, fabrics, wallpaper samples, photographs, china, glass, and wooden and mechanical toys including an elaborate Noah's Ark and animals will also be found among the more than 150 pieces in the exhibition, sponsored by the university, the Ontario Arts Council and the Macdonald Stewart Foundation.

The exhibition of Victorian articles will be open at no charge to the public, and lectures may also be attended by members of the public for a \$3 charge for each session. A place in each session must be reserved in advance by calling the university's office of continuing education.

The chairman of the symposium will be author John Julius, The Viscount Norwich of London, England. The keynote address on 19th century technology and its effect on art and social history will be delivered by Prof. Asa Briggs, the social historian and Vice-Chancellor of the University of Sussex who spoke on campus in 1973 on Victorian Cities. Participants will be representatives from federal and provincial governments, historic site boards, historical societies, heritage foundations, museums, art galleries, architectural groups, antique dealers and collectors, and interested citizens.

*"La chasse aux tourtes", painted by Antoine Plamondon, left, and a chair upholstered in Berlin wool work with a carved walnut frame, right, will be part of an exhibition of Victorian paintings, furniture, clothing, toys and other articles which will be on display in McLaughlin Library from June 3 to 22. # REPORT FROM BOARD OF GOVERNORS

April 24, 1975

Two new department chairmen were approved at the meeting of the board of governors April 24. New chairman of the Department of History is Professor W. W. "Stefan" Straka who has been with the department since 1967. He will take office on July 1 when Professor Margaret Evans completes her five year term as chairman. Dr. Robert Buschman of the University of Wyoming, Laramie, becomes the new chairman of Mathematics and Statistics in September when Professor Ted Newton completes 10 years in that office.

On the suggestion of the president the board approved giving \$300 awards to any Guelph faculty who win OCUFA teaching awards. This year three faculty members — physics professor Jim Hunt, chemistry professor J. M. Prokipcak and languages professor Allan Wilshire will receive awards at the OCUFA meeting being held next week on campus. They will become the 1975 recipients of the \$300 awards.

The board approved the collection of a 75¢ per student fee to be given to the UGCSA to be held in trust for payment of membership fees to the Ontario Federation of Students. The fee collection was passed by a substantial majority in a student referendum last October, and will begin in September.

The board approved the retention of Robbie, Williams Partnership as architects for renovations to the Agricultural Economics building. These renovations plus library renovations necessitated when administrative offices moved to the University Centre were among the few approved by the Ministry of Colleges and Universities in this year's submission. Although the board had hoped to have refunded the cost of the Hotel and Food building and the Biology building built with private funds, the government has extended the capital freeze as far as creation of additional space is concerned. The only other

expenditures approved were minor laboratory renovations.

Other appointments approved by the board follow: David Joyner, assistant professor in the Department of Zoology; Elizabeth Upton, acting director of the School of Hotel and Food Administration while Director George Bedell goes on leave after his first term of office (he has accepted a second five year term as director); Mead Cain and Michael Verdon, assistant professors in Sociology/Anthropology, and Innes MacKenzie acting chairman of the Physics Department until a new chairman is found. Professor Peter Egelstaff has completed his term as chairman and is going on sabbatical.

Professor Ken Gregory gave the board a comprehensive report of the multi-disciplinary cassava project which is working on a single cell protein feed for cattle. The feed, made from fermented cassava, could provide an easily produced low cost animal feed in developing countries.

## University's annual report is published

Rising enrolments combined with the "slip-year" method of financing made last year a difficult one financially for the University of Guelph, according to the annual report for 1974 released this week.

Enrolment increased by about 10 per cent from 8,326 in fall semester, 1972 to 9,259 in the fall semester, 1973 (December 1 figures), according to the report which covers the year ending June 30, 1974. The slip-year method, however, bases grants on the previous year's enrolment, resulting in a situation where the university "lost" about \$2 million in government financing compared to the funding it would have received under an "actual enrolment" system, President W. C. Winegard states in the report.

The university's budget reached an all-time high of \$56.3 million, up about \$5 million from 1972-73. Just over half of the university's income was received from the Ontario Ministry of Colleges and Universities, with student fees accounting for another 11 per cent of the budget. About \$9.7 million (17.3 per cent of the budget) was supplied by the Ontario Ministry of Agriculture and Food for research and services.

Expenses in the academic sector rose about \$2 million to \$18.6 million accounting for about one-third of the budget. Costs for related academic and student services increased by about \$700,000 and \$255,000 respectively, accounting for about 10 per cent of total expenses. Other expenses were up noticeably with the exception of administration which dropped over \$100,000 to \$1.6 million.

Small increases in the government's per student grants made 1973-74 a "difficult year", while the 7.1 per cent increase for 1974-75

will make the current year even more difficult in light of rapidly increasing expenses, according to President Winegard. "There is serious trouble ahead unless we can convince the public and the government that increased costs should be met by increased grants", he commented.

But the last year was also a good one in many ways. The Ontario Agricultural College celebrated its centennial in 1974 with many memorable events. A special grant from the Ontario Ministry of Agriculture and Food, combined with contributions from alumni and friends and a grant from the City of Guelph provided for the new OAC Centennial Arboretum Centre and site development in recognition of the centennial. Other building projects also went ahead including the new Pathology building for the Ontario Veterinary College, which is being financed equally by the provincial and the federal governments, and the new Hotel and Food Administration building which is being financed by a special fund raised by the Hospitality Industry.

Funding for research at the university increased about six per cent to \$11.6 million, with the bulk of the money (about \$7.7 million) supplied by the Ontario Ministry of Agriculture and Food. Research funds received from sources other than OMAF increased by 10 per cent over the previous year, with the National Research Council increasing its support by about 14 per cent.

Copies of the annual report have been mailed to faculty and staff and additional copies are available from the Department of Information, on Level 4 of the University Centre.

## Safety bulletin

from the Safety Security Department

### Azide hazards

A recent article in the Journal of Chemical Education points out the hazard of allowing sodium azide to enter copper, lead or brass drains. Copper or lead azides, which are extremely explosive even in small quantities, may be formed from dilute solutions such as are released as waste from Sorvall automatic cell washers, Technicon blood grouping machines or Coulter counters.

Anyone who is releasing sodium azide into the drainage system from a laboratory is requested to contact the Safety Office in order that arrangements may be made to have the waste lines checked for the presence of lead or copper.

It is particularly important that all requests to the Maintenance Department for work on plumbing systems where azides may be present be accompanied by a warning, even where lead or copper is not thought to be present.

### First aid training

In order to meet the requirements of the Workmen's Compensation Act for provision of qualified first aiders in every area of the university, the Safety Security Department provides first aid training free of charge for any member of faculty or staff.

During the last three years, 200 employees have taken this training. A course will be starting in the near future. For more information or to register, call Ext. 3132.

## Guelph trains much-needed mechanics

When it became apparent that agriculture in Ontario required more qualified farm equipment mechanics, it was only logical that the Ontario Agricultural College be picked to help solve the problem.

In keeping with its century-long tradition of service to agriculture, the Ontario Agricultural College began offering a farm equipment mechanic's course in 1967. The course, the only one of its kind available in Ontario, was recommended by the province's Farm Machinery Investigation Committee as one way to help alleviate a shortage of qualified farm equipment mechanics. Although the program was started under the Ontario Ministry of Agriculture and Food, it has been run under the Manpower Training Branch of the Ministry of Colleges and Universities and Canada Manpower and Immigration since 1972.

Almost 100 students have completed the course directed by Professor J.R. Scott of the School of Engineering since it began. Two graduates from this year's advanced level class were honoured for their achievements at the awards ceremony recently.

The Ontario Wholesale Farm Equipment Association awarded \$125 to Bill Langford of Tupperville for placing first in his class, and gave \$125 to Howard Cunningham of Bolton as the most improved student in the graduating class of 19. The annual awards were presented for the association by Gil McIntyre, sales manager for Massey Ferguson Industries. Mr. Langford also received a wall plaque in recognition of his high marks from the Ontario Manpower Training Branch, with area counsellor W.H. Revell making the presentation.

The course has been a prerequisite for licensing as a qualified farm equipment mechanic since 1971 under Ontario's Apprenticeship and Tradesmen's Qualifications Act. The program is divided into three sections held about a year apart to allow the students to gain experience by working as apprentices at farm equipment dealers. The students must also complete a four or five year apprenticeship program (depending on high school education) and pass provincial examinations before they can qualify as licensed farm equipment mechanics.

The basic course is 14 weeks in length and along with their mechanical training, the students also attend lectures on soils and other agricultural topics. The eight week intermediate and advanced courses are devoted to technical training ranging from equipment design to engine overhaul techniques, combining both shop and classroom work. The students must have an apprentice's job with a dealer before starting the course, but receive a government training allowance while attending sessions.

The program is now turning out about 20 advanced level graduates a year, compared with about eight during its early years, but the need for qualified farm equipment mechanics is still great, according to Professor Scott. He estimated that Ontario's 500 farm equipment dealers need about 200 qualified mechanics to fill all available openings each year and that the demand will continue to grow as farm machinery becomes more and more complex and requires a higher level of servicing.

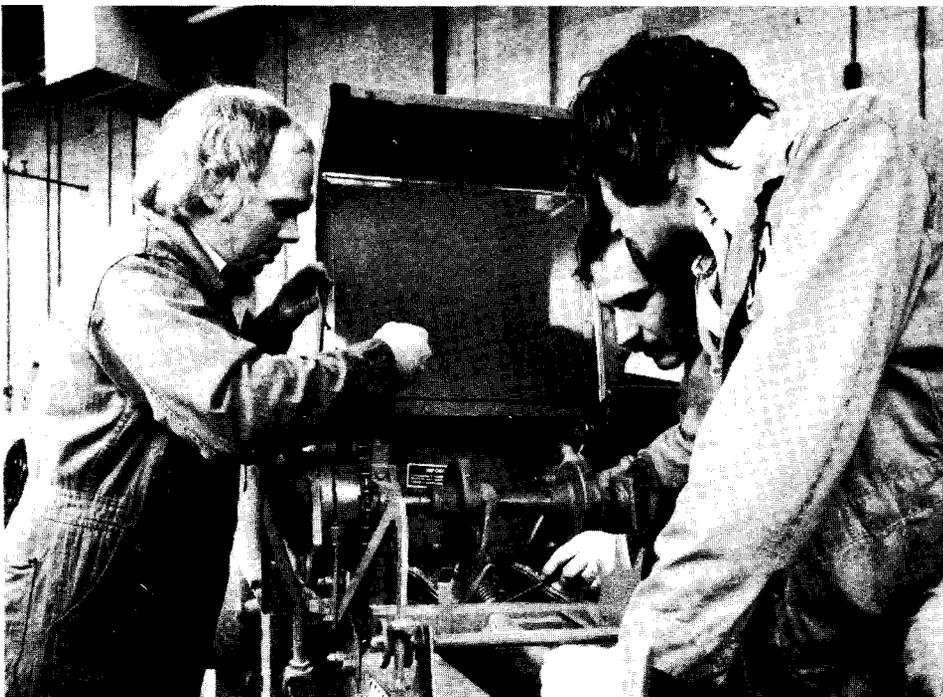

## Alumni institute Winegard professorship

British zoologist Ian Potter has been named to the first Winegard Visiting Professorship, established by the University of Guelph Alumni Association Alma Mater Fund to honor the retiring president. For the first two years the position will be in environmental studies, tenable in the College of Biological Science, with three professors coming to the campus for one semester during the first year. Dr. Potter will arrive on campus early next week. A citation announcing the professorship was presented to the president by Dr. D. S. MacDonald, 1975 campaign chairman of the Alma Mater Fund, at a meeting of the founding members of the Century Club last Saturday.

Dr. Potter is a senior lecturer at the University of Bath in Bath, England. He will spend the spring semester in the Department of Zoology where he will conduct cooperative research and be available to consult with students and give seminars.

He has worked in Australia, Europe and the United States and Canada, pursuing his interests in ecology, behaviour and physiology in parasitic and non-parasitic cyclostomes.

Dr. Potter is a graduate of Oxford, took his Ph.D. at the University of New South Wales in Australia and did a post doctorate at Duke. He was a visiting research scientist at the Bureau of Commercial and Sport Fisheries in Michigan and a visiting professor at Scripps Institute of Oceanography in California. In addition he has visited the University of Guelph on several previous occasions to consult on research programs with Professor Bill Beamish, chairman of the Department of Zoology.

Bill Langford of Tupperville, left, top student in this year's advanced farm equipment mechanic's course, checks the timing of the knotter in a baler with Fred Priester of R.R. 3 Tillsonburg, centre, and Wayne Feltz of R.R. 5 Stratford.

Zoologist Ian Potter

## Winegards return from Asian trip

Dr. and Mrs. W. C. Winegard have returned from a three week trip to India and southeast Asia where the president attended the Singapore meeting of the board of governors of the International Development Research Centre. The Winegards also had a short visit with Carol and Selva Selvarajah in Malaysia.

Selva, the first graduate student senator at the University of Guelph, received his Ph.D. in poultry science in 1970 and is now director of the planning and evaluation division of Malaysia's National Livestock Development Authority. He arranged a reception for the Winegards attended by 27 Guelph graduates and their spouses. Also at the reception were recently retired OVC professor Dr. M. A. Soltys and his wife. Dr. Soltys is now at the Universiti Pertanian Malaysia near Kuala Lumpur on a CIDA contract.

While in India the Winegards visited a village near New Delhi where the green revolution has taken effect. IDRC has projects in India, Malaysia and Singapore, many of them involving rural development, Dr. Winegard said. The Winegards visited with another Guelph graduate in New Delhi, Bill Lundy who is the second secretary of the Canadian Manpower and Immigration Branch of the Canadian High Commission.

President W. C. Winegard who has been heard to say "what I know about agriculture you could put in your ear" was awarded an honorary diploma in agriculture at the OAC party Friday night. The diploma was presented by Associate Dean Gordon Ball. Also honored at the party were retiring staff and faculty members: Professor W. C. "Scotty" Allan, Environmental Biology; Professor Harvey Pettit, Animal and Poultry Science; Professor Bruce Twamley, Crop Science; Professor Bill Ewen, Land Resource Science; B. Barabas, Horticulture; Jan Gansekoel, Engineering.

## PERSONALS

### MISCELLANEOUS

Found — 2 marine charts near Animal Science Bldg., 3552; Kittens, assorted colors, male and female, free to good home, 823-5367; Mother will babysit in own home, Scottsdale Dr. area, meals provided, 824-4428; Wanted ride to Elora 9 a.m. and back to Guelph 5 p.m. daily, Isabel 821-0729; Wanted to buy — Autoharp, 823-1664; Bedroom and living room furniture, 821-6432, after 6 p.m.; Ladies' 3-speed bicycle, 2213 or 821-8454; 3 or 5-speed bicycle, 3244 or 823-5927.

### HOUSING

For Rent — 1 bedroom apt. in Guelph, 1-416-233-7516; 3 bedroom furnished house on Oxford St., large kitchen, living-dining, den, mid-Aug. or Sept. 1 for 1 yr., 3982 or 821-5873; Furnished 2½ storey brick house, 5 bedrooms, 1½ bathrooms, large living room, den, close to schools and downtown, suitable for faculty family, Sept. 1975 - Aug. 1976, 822-6911; 4 bedroom house close to Exhibition Park, schools, bus, Sept. 75 - Aug. 76, 2721 or 822-3832; Garage, 3801 or 823-1236; 2 rm. furn. bachelor apt., 3801 or 823-1236; Rooms in five bedroom house, 25 Yorkshire Street, 836-8534.

For Sale — 4 bedroom, 2 storey home, University Village, 821-6851; Wanted — furnished housing from June 15 to August 31, for retired parents, 2506 or 822-5942.

### FOR SALE

Registered Irish Wolfhound pups, Dr. Dingwall, 2635 or 823-1777; Chesterfield and chair, crib, dresser, 824-9506; Sailboat O'Day Sprite, 11 ft. fibreglass sloop, 2538; 1971 Oldsmobile Vista Cruiser wagon, V8, power steering and brakes, air conditioning, radio, Mr. Brock, 271-9230 or 271-4603; Regina electric broom, like new, 3550 or 824-6927; Girl's bike, Amy, 8387; Stove, 843-4335; 1969 Tag-a-Long soft top tent trailer, spare, mattresses, awning, and 1970 Merc. 20 h.p. motor, short shaft, forward and reverse, cruise-a-day tank, 824-1853; Five Uni-royal Fastback belted tires H 78-15, one new, and two Hyway-Byway snow treads 78-15 mounted on rims to fit Olds. 88, 822-8628; Shih tzu puppies, 1 male, 1 female, CKC registered, sired by Canadian champion, 821-3757; Commodore portable typewriter, 821-1656; 73 VW beetle, 3942 or 821-5067; Four-piece Spanish living room suite, 824-9308; 1971 Toyota 1200 cc station wagon, 1971 GMC ½ ton pick-up truck, 3247 or 843-4248; Boy's soccer shoes, Adidas, size 6, 824-4829; Three refrigerators, 54" cast iron and brass bed, double bed and single bed, B & W television, 30" electric stove, lamps, bookcase, chesterfield, ladies 26" 5-speed CCM bike, men's 10-speed bike, 2597 or 822-5602; 5 h.p. riding mower, 3927 or 823-9849; Ironing board, matching chesterfield and chair, two used snow tires, 12", 8582 or 824-1944; Apt. size washer spin dryer like new, 823-1395.

## OCUFA

*Continued from page 1*

Following consensus at this level, representatives from this group would take their agreement, in the form of a proposal, to the Ontario Council on University Affairs and, with their participation, enter into a second level of negotiation with government members directly involved with the allocation of university funds. Professors see this government-level determination of academic salaries as entirely suitable, placing as it does the responsibility on the doorstep of the paymaster.

The salary portion for each university agreed on at the second level of negotiation would also be affected by what the report terms "faculty entitlement." To arrive at a satisfactory formula for this the group suggests a "weighted student/faculty ratio to be developed for the system and for each university. For the sake of stability it would like to see actual adjustments to salary funding in relation to student numbers as only some fraction (in the range of ¼ to ½) of enrolment shifts either positive or negative and a maximum annual decrement specified "to protect institutions from the need for crisis responses."

The group believes it is essential that some form of this province-wide system be working for the academic year 1976-1977, which means that the scheme would have to be agreed upon by all parties no later than this fall.

## People and wildlife, symposium subject

When the Wildlife in Urban Canada Symposium is held on campus next month the keynote speaker will not be present but his speech will.

Advised by his doctors not to travel, Dr. C. A. Doxiadis, internationally known city planner and architect, has notified the symposium planners that he will not be able to attend the meeting May 26 to 30. However he has arranged for Alexander Lehman, an architect-planner and president of the Lehman Group Inc., Toronto, to deliver the speech. Dr. Doxiadis called Mr. Lehman one of Canada's leading ekistics — an expert on human settlements.

The symposium, one of the first ever held in Canada on this important environmental subject, will bring together specialists from many fields, as well as interested people from all walks of life, to discuss the problems of wildlife existing in the urban setting. Dr. Doxiadis is a leader in the field of designing cities where people and wildlife live together in harmony, and his speech will set the theme of the symposium. He is also president of the Athens Technological Organization, Athens Center of Ekistics, Greece.

Dr. Doxiadis has achieved international fame for his work on plans to help restore, or preserve, a mutually satisfactory balance between people and wildlife in places ranging from industrial centres like Detroit to developing nations such as Zambia and Ghana. He believes in man's desire to work out a "happy marriage" between himself and wildlife or nature; between the "Ecumenopolis and the Ecumenokepos, the global city and the global garden."

In a recent edition of *International Wildlife*, he described his vision of how such a union could be reached to the benefit of man and nature. As cities grow, nature retreats. Cities have always grown, he said, making the concept of a green belt for nature unsatisfactory as it will sooner or later be absorbed by the city. Instead cities must embrace nature, invite wildlife back, rather than trying to keep it out with safety belts, he said.

To do this the city must change; it must grow naturally while letting man be closer to nature. He described an ideal city consisting of small communities infiltrated by wildlife — the automobile limited to "deepways" or underground highways. Here the automobile and its friends are no longer in control of the city and man's love affair with nature has developed into "a system of nature infiltrating through avenues, streets and narrow paths, entering every house", he said.

On the personal or local level, courtyards and other small areas can be built or saved to provide a natural setting for man and wildlife, while with imaginative planning, building does not always have to destroy a natural setting or plants like trees, he pointed

out. Such planning will become even more important as urban areas grow on a global scale. By 2000 A.D., man's settlements will cover twice as much land as they now do, with large urban centres more than doubling in size, and a world population of between three and four billion. "The global population is going to become urban, and all human settlements are going to form the global city or Ecumenopolis," he said.

International co-operation will be necessary for planning on a global basis, and if man starts to plan wisely Dr. Doxiadis believes there will be no such thing as a space problem because more than 94 percent of our globe can be devoted to wildlife and plantations even with a world population of 20 billion. "I am convinced that if we follow such a practical road the love story (between man and wildlife) will turn into a marriage that will make our globe a paradise, the big garden Man has always dreamed of", he said.

His message is clear: a new balance between man and wildlife must be worked out at all scales and especially in the urban setting as the global city develops. Although Dr. Doxiadis won't be present at the Wildlife in Urban Canada Symposium, his innovative approach to planning for both people and wildlife and his belief in man's desire and ability to attain a new balance between himself and nature in his cities are almost certain to come across in his keynote speech.

The symposium will also have many other speakers, including wildlife pathologists, biologists, planners and environmental designers, landscape architects, conservationists and specialists from many other fields. They will deal with topics ranging from urban planning and wildlife to the compatibility of pets and wildlife.

Five concurrent workshops will give those attending the symposium the chance to bring their knowledge and the expertise of guest speakers to bear on different problems in an attempt to find effective solutions. The workshops will cover many aspects of the existence of wildlife in the urban setting, from the relationship between industry and wildlife to education.

The symposium is being sponsored by the University of Guelph's office of continuing education and the Ontario Ministry of Natural Resources. Other co-sponsors are the Canadian National Sportsmen's Show, the Canadian Wildlife Service, the Nature Conservancy of Canada, the R. Samuel McLaughlin Foundation, the Province of Alberta's Department of Lands and Forests; the Province of Manitoba's Department of Mines, Resources and Environmental Management; the University of Calgary's Faculty of Environmental Design and the World Wildlife Fund (Canada).

## R.S. Ritchie lecture for May 15

Collective bargaining as public policy is the topic of this year's Ronald S. Ritchie lecture to be held on campus May 15. Dr. A. W. R. Carrothers, president of the Institute for Research on Public Policy, will give the talk, the third of an annual series set up to honor Mr. Ritchie a former chairman of the university's board of governors who did the preparatory government report for setting up the Institute. He was also first chairman of the IRPP board of directors, a post now held by lawyer John B. Aird. Mr. Ritchie was a member of the board of governors from 1965 - 1972 and chairman for the last four years of his term. He is now principal assistant to the leader of the federal opposition.

Dr. Carrothers, a lawyer, has been president of the Institute since its inception a little more than a year ago. Before that he was president of the University of Calgary for five years. He has lectured on industrial relations and written articles on labour arbitration in Canada. He was dean of law at the University of Western Ontario from 1964 to 1968.

The Institute for Research on Public Policy is concentrating its research on the study of public policy issues related to change in the Canadian population in its first year of operation. A study on population trends and developments and the identification of problems should be completed this year, raising a wide range of public policy issues to be examined as the Institute's scope for research activities widens. An examination of three problem areas with a population base has also been started. These are age structure of the Canadian population; implications for public policy in the 1980's; immigration, emigration and internal migration; and income distribution and expenditure.

## Instruction workshop

Carleton University has announced plans to hold a series of six two-day workshops on various aspects of instructional development during May and June. Participants are welcomed from any Ontario university and no fees will be charged, although travel and accommodation will be the responsibility of the person attending. The Summer Institute Workshop program is being sponsored by Carleton's senate committee on instructional development and the Ontario Universities Program for Instructional Development. The workshops to be offered are: Producing self-instructional packages May 13 - 14; Management of small group discussion May 15 - 16; Simulation use and design June 10 - 11; Production of instructional materials June 12 - 13; Making the most of the large lecture method June 19 - 20. Further information can be obtained from J. R. Landsburg at Carleton University, Ottawa.

## FACULTY ACTIVITIES

Professors R. A. Carlton and Neil J. MacKinnon, Sociology and Anthropology, were participants in the recent symposium on problems of development in Atlantic Canada, sponsored by the Royal Society of Canada and the Canadian Sociology and Anthropology Association, Mount Allison University, Sackville, New Brunswick. The symposium brought together about 100 experts and practitioners from universities, government, industry and community to examine the problems of development in Atlantic Canada within a comprehensive context.

Noel Harding was a guest lecturer at the Ontario College of Art where he spoke on video art and its relationship to his work. He recently opened his second one-man show at the Kitchen Gallery in New York City.

Professor Tom Lane, Land Resource Science, attended the 3rd International Symposium on Livestock Wastes at the University of Illinois, Urbana-Champaign.

Professor E. A. Cebotarev, Sociology and Anthropology, spent a week in Rome at the invitation of the Human Resources Institutions and Agrarian Reform Division of FAO for discussions of the place of family improvement programs in integrated rural development.

Professor John T. Powell, Human Kinetics, was guest speaker at the National Secretaries Association Executives' Night Dinner at the Brantford Golf and Country Club. The title of his talk was Olympic Preview.

Professor Elizabeth Waterston, English, was key-note speaker at a conference on Canadian Literature in Winnipeg. The conference was organized by the curriculum branch of the Ministry of Education and the Manitoba Association of Teachers of English.

Professors L.R. Webber, Tom Lane, Land Resource Science and John Robinson, Environmental Biology, attended the Agricultural Economics Research Council of Canada Symposium on commercial uses of wastes as animal feeds at the Inn On The Park, Toronto.

Professors H. Tiessen and B.J. Teskey, Horticultural Science, attended the 16th Annual Convention of the Ontario Institute of Agrologists at Kemptville, recently.

## Bus trip

Tickets are still available for a bus trip to Niagara Falls and area (Niagara-on-the-lake) planned for Wednesday, May 21, by the luncheon group of the College Women's Club. The 47-seat air-conditioned tour bus will be leaving the Willow West Shopping Centre at 9:15 a.m. and returning at 5 p.m. Planned activities include a luncheon at the Skylon, the revolving restaurant on the tower at Niagara. Bus tickets are \$3.75 each and may be purchased for guests. For tickets and more information, contact Betty MacGregor at 822-5901 or Leah Wright at 822-7180.

Over 100 geomorphologists from all over North America gathered on campus last week for the 4th Guelph Symposium on Geomorphology. Keynote speaker was Dr. D. J. Varnes, left, of the U.S. Geological Survey in Denver, who spoke on mass movements on the west of the continent. Conference organizer Tony Ward of Geography is in the centre with Dr. Ralph Peck, a civil engineer from the University of Illinois, Urbana, on the right. Dr. Peck was a long time collaborator with the late Karl Terzaghi, often called the "father of soil mechanics."

## CAMPUS BRIEFS

### Boston marathon

Two University of Guelph runners were among the 2041 starters in the Boston Marathon. David Yaeger, eighth semester engineering student, broke his own campus marathon record when he completed the famous 26 mile, 385 yard race in two hours, 26 minutes, 35 seconds, finishing 75th. He was co-winner of the recently awarded Hamilton Olympic Club trophy for the most advanced track athlete at the university. University of Guelph running coach and languages professor, Vic Matthews, recorded a personal best of two hours, 32 minutes, four seconds to place 140th. The Guelph runners were fifth and twelfth of the more than 100 Canadians in the event.

### Orientation

Orientation for spring semester freshmen will get under way tonight at 7:30 p.m. with residence students meeting in their residence areas, and off-campus students meeting in the 8th floor lounge of the Arts building. After these meetings, a free film will be shown in the main lounge of the East Residence and the University Centre Games Room will be open at no charge for the freshmen. The orientation period will continue until May 8, with a varied program of social and academic events. Open meetings will be held on responsible sexuality (May 6), tenant and landlord information (May 7), and home management hints (May 8), in the 8th floor lounge of the Arts building. Information on the orientation program is being sent to all freshmen by the Department of Student Affairs which is in charge of the activities.

### AUCC appointment

Dr. Claude Thibault, formerly a history professor and assistant to the principal of Bishop's University, has been appointed executive director of the Association of Universities and Colleges of Canada. Dr. Thibault went to AUCC as associate director last year. In his new position he will be responsible to the board of directors for the affairs of the AUCC, a national, voluntary association of 63 universities and colleges. He succeeds Dr. Colin B. Mackay who is retiring.

### Big Brothers auction

Guelph Big Brothers Association's annual fund raising event, Auction '75 will be held this Saturday, May 3, at the Guelph Armoury. The event gets under way at 9 a.m. and includes everything from a box grand piano to electrical appliances, antiques and stoves. At the same time a rummage sale will feature good used clothing, new and used books and knick-knacks. And for those men interested in becoming big brothers — some 75 will be needed this year — personnel will be on hand to answer questions and provide more information.

### Free film program

All films will be held on Fridays at 8 in Physical Science 105. There is no admission fee.

- May 9** The Blue Angel (Marlene Dietrich, Emil Jannings)  
**May 16** no film  
**May 23** Chimes at Midnight (Orson Welles)  
**May 30** Rhythm on the Range (Bing Crosby, Martha Raye)  
**June 6** M (directed by Fritz Lang, starring Peter Lorre)  
**June 13** She Done Him Wrong (Mae West, Cary Grant)  
**June 20** It Came from Beneath the Sea (Kenneth Tobey)  
**June 27** Ten Days that Shook the World (directed by Sergei Eisenstein)  
**July 4** Abbott and Costello meet the Mummy  
**July 11** The Drylanders (James Douglas, Frances Hyland)  
**July 18** Nobody Waved Goodbye (Peter Kastner, Julie Biggs)  
**July 25** Son of Ali Baba (Tony Curtis, Piper Laurie)

The program is subject to last minute change.

### Girls' softball

Anyone interested in joining the University of Guelph girls' softball team should contact Judy Kerr at Ext. 8734. The team which plays in the Guelph Girls' Softball League is sponsored by the University of Guelph Staff Association.

*"Is it straight?" is the question on the faces of fine art professor Walter Bachinski and Judith Nasby, curator of art as David Hattle and John Emmert hang Walter Bachinski's Running Mother and Child near the porter's desk in the Arts building. The cimint fondu relief is a gift of the Alma Mater Fund 1973 to the university.*

### grub resurrected

After lying dormant a couple of years, *grub* the university's hardy magazine of verse, prose, and pictures glows pallidly again. The resurrection issue, adorned by a fingered skull emerging from the grave and containing work by Julia Wallace, Peter Taylor, James Harrison, and others, is available for 25¢ in the Department of English, Rooms 437 and 408. Contributions are gratefully received and considered for publication by Linda Marshall and Marshall Matson, in care of the English Department.

### Adult classes

Fitness and social dance classes for adults are again being offered in the Athletics Centre, beginning the week of May 5. Fee is \$15 except for full-time students who may register for \$5. Dance classes on Tuesday or Thursday at 8 p.m. in the dance studio will cover waltz, rhumba, cha cha and jive. Fitness classes for women will be held at noon in the large gym at 12:10, or in the dance studio on Tuesday and Thursday at 6 p.m. Slow-paced fitness classes for women will be Wednesday at 1:30 p.m., rhythmical gymnastics Tuesday at 7 p.m. Co-ed fitness classes will be held in the small gym Tuesdays and Thursdays at 4 p.m. Register at the cashier's wicket in the Athletics Centre and bring your receipt to the first class.

### Outdoors club

The Outdoors Club meeting originally announced for Crop Science 121 will be held in Physical Science 317. The club which is open to any member of the university community interested in camping, canoeing, rock-climbing, cycling and hiking, will meet on Tuesday, May 6.

### Stephen Lewis

Stephen Lewis will speak on Canada's agricultural policy on Thursday, May 8, as part of the conference of the Environmental Science Teachers' Association of Ontario. The lecture which is open to the public, will be held at 8 p.m. in Physical Science 105.

### Green thumb day

The annual green thumb day held by the Alumni Association will be on Saturday, May 10, with sessions on gardening from terrariums to vegetables and a talk on selection and management of horses. An afternoon walk will culminate in a ceremony at the Arboretum when alumni and friends may plant trees with the assistance of director Professor Robert Hilton. Cost of the day is \$5 for adults and \$2.50 for children. A special children's program will include a tour, games and movies. Registration will be at 9:15 a.m. at the main entrance to the University Centre. Complete details in next week's News Bulletin.
